Note Me Android Application
SCCI/01167/2018

This is an android application that run natively on android devices This application allows the user to register and create an account after which a validation email will be sent to them to activate their account. After validation the user is able to login and start interacting with the application. The application's main goal is to help you create short notes which are stored locally in your device when you are not connected to the internet, upon reconnection you can synchronize your notes with the online API storage which stores your notes. This indicates that once synced the application can be used if you are not connected.

Splash Screen

This is the first screen you encounter when you first launch the application it contains the logo for the application and the Application name. This screen serves the purpose of loading necessary requirements and user data that is needed during usage of the application

Home page

This is the page you encounter after a successful login into the application from where you can view your notes if you had already created notes with the application. If you do not have notes with the application, you will receive a page with a vector image indicating you do not have any notes yet. It is also from this screen that you can long click on a present note and delete it from the system and cache. It is also from this page that you get utility button to add a new note which upon click directs you to a page from where you can create a new note. Furthermore upon clicking on an existing note you will be direct to a page from where you can view its details and also edit its content.
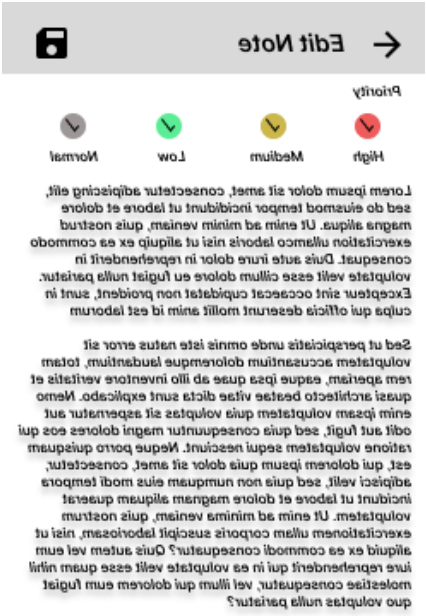

Add note page

This is the page that is the result of clicking the utility button of adding a new note in the home page. On this page you get an editor from where you can type your texts and an editing tool for formation your text. You can also set a priority for your note using 4 levels i.e., high, medium, Low and normal. After clicking the save icon on the toolbar you are directed back to the home page from where your new note is added to your list of notes.

Edit note page

This page also functions the same as the add note page but this serves the function of letting you edit a present note

Edit profile page

This page serves the purpose of editing personal details about you user profile and keeping it up to date with the system.
